

Business Intelligence Report

FY 2022 – 2044

Prepared by Analytics Team

Business Objectives

Products with high overstock and low sales

Identify Products low in demand,
so save inventory space and
reduce cost.

Predict demand trends

Analyze product demands season
wise, to make most output from
high demand products.

Inventory Adjustment

Analyze stock leftovers and
seasonal demand to adjust
inventory with right stock at right
time.

Seasonal Demand Pattern

Season		Sum of UnitsSold
☐	Christmas	8043
☐	Festive	12148
☐	Off-Season	13011
☐	Summer	11375
Total		44577

Key Observations:

Off-Season leads with 13,011 units driven by high product count across Jan–Apr and Sep, accumulated sales of 5 months = Volume per month is low.

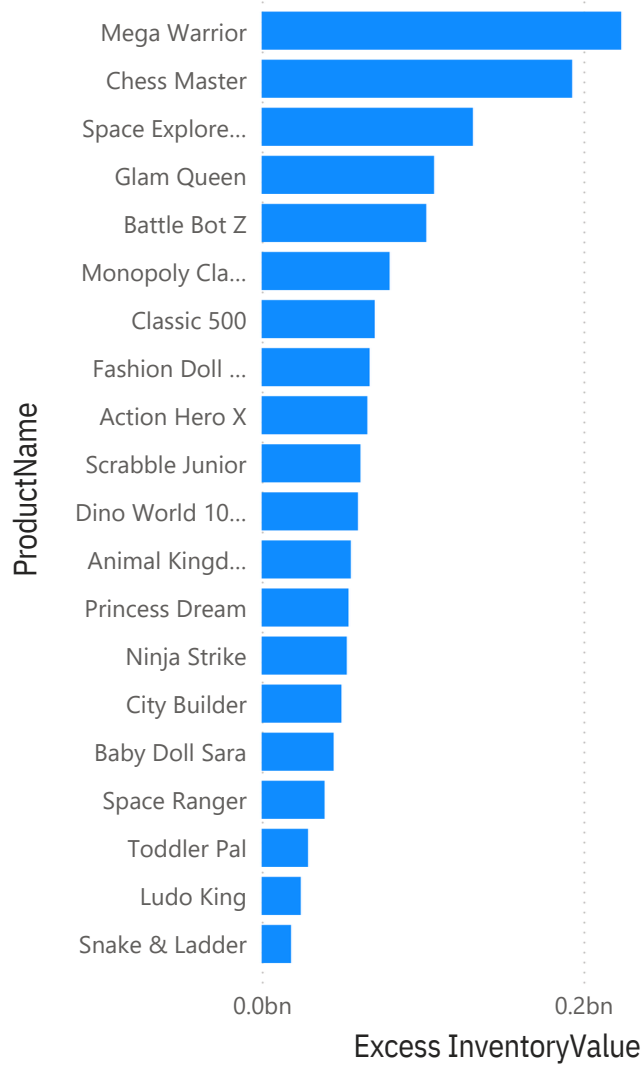

Festive season with 12,148 units sold follow closely in span of 2 months and Summer 11,375 units sold due to vacations of school kids.

Christmas has lowest volume 8,043 but highest sales intensity in single month.

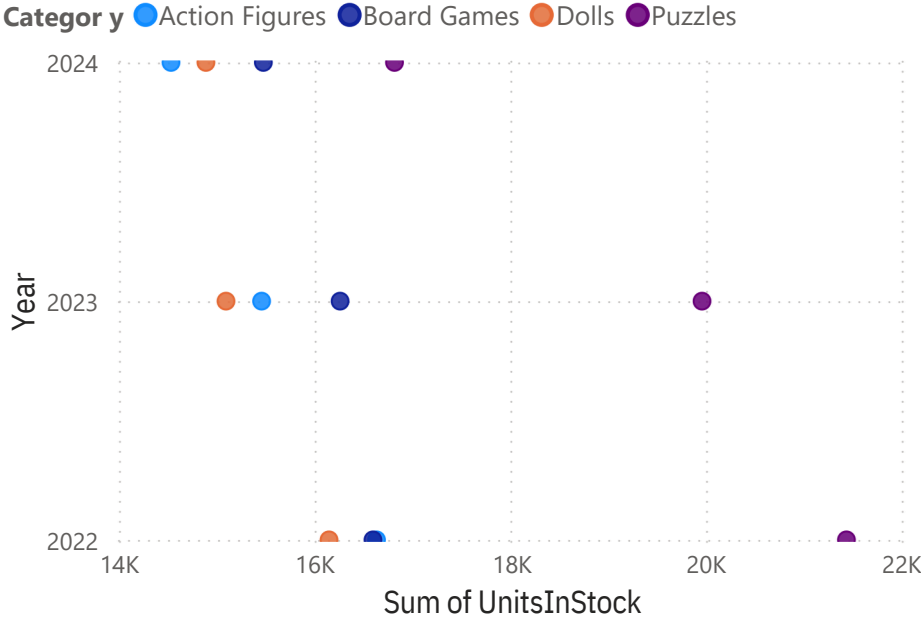

Sales grow slightly each year across all seasons steady upward trend.

Excess Inventory & Overstock Analysis

Excess Inventory Value by ProductName

Sum of UnitsInStock by Category and Year

Key Observations:

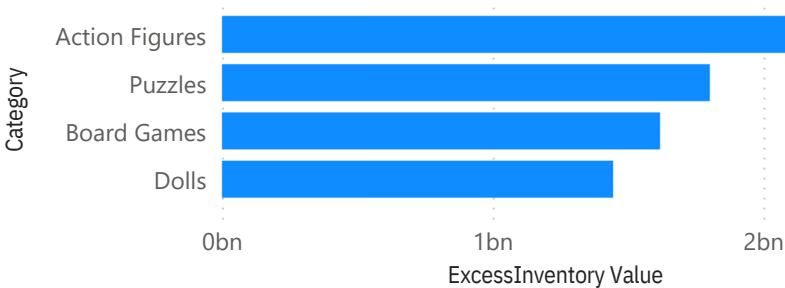

Mega Warrior and Chess Master are biggest capital traps. Highest excess inventory value.

Action Figures category holds most excess inventory overall.

Puzzles are heavily stocked by numbers, but Action figures are giving more impact value wise.

Overstock reducing year over year in scatter, positive sign but still significant.

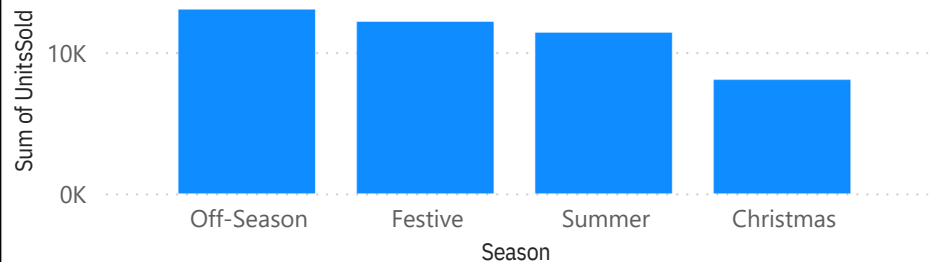

Excess Inventory Value by Category

Total					

Sum of Units Sold by Season

Key Observations:

Dolls and Action Figures dominate sales across all seasons.

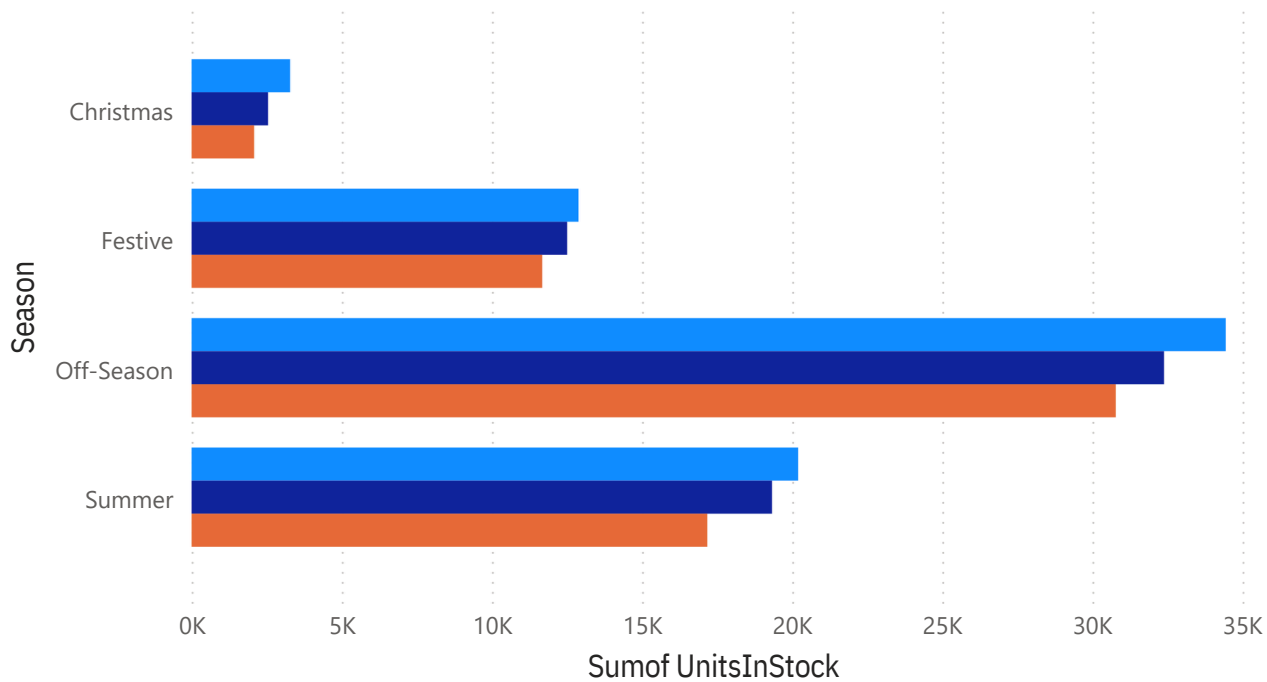

Puzzles is weakest in Summer given there are 4 months, low stocking needed during that period.

Puzzles sell is better in Off-Season and Festive. counter-intuitive but consistent across 3 years.

Season Wise Leftover Stock

Sum of UnitsInStock by Season and Year

Year ● 2022 ● 2023 ● 2024

Key Observations:

Off-Season has massively high leftover stock 30K –34K.

Christmas leftover stock is lowest 2K–3K. Stocking is near optimal.

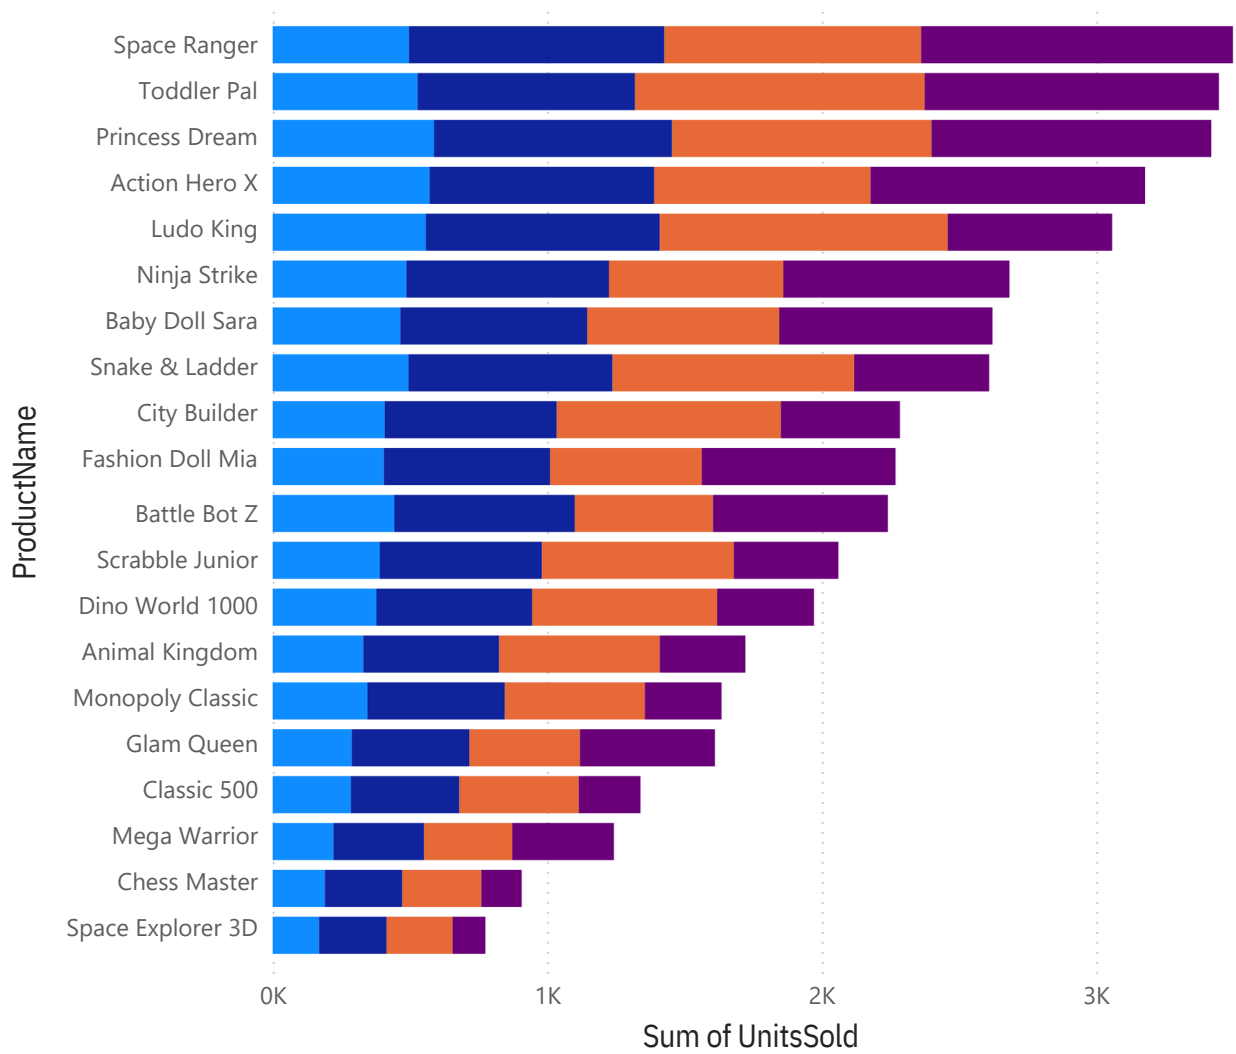

Festive leftover still high 11K–12K. slightly over stocked even in peak season.

Year over year leftover stock is declining meaning inventory management improving.

Reorder Strategy&Optimizations

Stockout Rate % by ProductName

Stockout Rate % by Season

Key Observations:

Space Ranger and Toddler Pal are top sellers across all seasons.

Chess Master and Space Explorer 3D are clear underperformers, low sale/high stock.

Mega Warrior has 17,737 units in stock vs only 1,243 sold worst overstock ratio.

Ludo King and Snake & Ladder have lowest excess inventory selling well relative to stock.

Space Ranger has highest stockout rate of 11%.

Ludo King, Ninja Strike, Snake & Ladder follow . All Action Figures and Board Games

These are high-demand, low-cost products, stockouts directly mean lost sales

Christmas and Festive are only season where these stocks run out leading to revenue loss.

Strategic Recommendations

Quick Wins (0–3 months)

- 1) Raise reorder points for Space Ranger, Ludo King, Ninja Strike, Snake & Ladder immediately
- 2) Set reorder trigger at 20% of average monthly demand. Don't wait for zero stock.
- 3) Reduce next order quantity for Mega Warrior and Chess Master by 40% - ₹11M tied up.
- 4) Run clearance promotions on overstocked products to free warehouse space before festive season.

Long-Term Strategies (3–12 months)

- 1) Build a seasonal reorder calendar, stock high-demand products 6–8 weeks before Festive and Christmas.
- 2) Cut Off Season orders by 30% across all categories as leftover stock consistently exceeds 30K units.
- 3) Introduce min-max stock policy for every product defined reorder floor and stock ceiling.
- 4) Use 3 year sales trend to forecast demand like sales is growing by 7% annually, factor into order quantities.
